ABOUT GRAINTECH :-

GrainTech is the trade event for the grain industries technology and related products, in Bangladesh. International Exhibition for Grain Industries Technology will give a huge opportunity for national and foreign manufacturers and producers to launch their latest products and equipments as well as build brand image across industry market. The expo will exhibit an assorted range of grain technology, mills, silos, automatic bakery lines, fodders, pasta equipments, oil factories and rice beaters. The visitors will get a chance to see, compare and buy the best products according to their preference. GrainTech will offer an ideal prospect for farmers, traders, brokers, manufacturers, distributors and sellers to come together at place, to communicate, develop new business contacts across world market.

BENEFITS OF PARTICIPATION :

Exhibitions are one of the most effective mediums for establishing and maintaining customer relations.

In an increasingly digital age, they are the only media where buyer, seller and product physically come together a potent force of business.

Through your participation you can:-

1. Generate Sales
2. Gather business contacts for post show follow-ups
3. Identify agents, distributors etc,
4. Launch a new products
5. Enhance existing customer relationship
6. Develop product awareness
7. Reach a new market
8. Demonstrate a complex product
9. Conduct market research
10. Generate media coverage
11. Provide platform to national and international organization to negotiate business deals and secure linkage.

ABOUT BANGLADESH MARKET :

Agriculture is the dominant economic activity in Bangladesh and regarded as the lifeline of the Bangladesh economy. Its role is vital in enhancing productivity, profitability and employment in the rural areas. As the largest private enterprise, contributes about 21% of the GDP, sustains the livelihood of about 52% of the labour force, and remains a major supplier of raw materials for agro-based industries. Agriculture plays an important role in the overall economic development of Bangladesh. In order to achieve the GDP growth rate of 7% per year, agriculture must grow by at least 4-4.5% per year (PRSP, 2005). This is presumably possible through an increase in agricultural productivity based on modern agricultural technology and a supply chain linking farmers with consumers in the domestic as well as overseas markets.
